

Exercise – 2 → Factory Method Pattern Example

Aim: To implement the Factory Method Design Pattern in Java for creating different types of documents such as Word, PDF, and Excel.

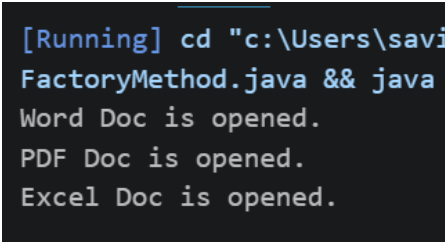

Files

- Document.java
- WordDocument.java
- PdfDocument.java
- ExcelDocument.java
- DocumentFactory.java
- WordDocumentFactory.java
- PdfDocumentFactory.java
- ExcelDocumentFactory.java
- FactoryMethodTest.java

Description

The Factory Method Pattern provides an interface for creating objects while allowing subclasses to decide which object to create.

Expected Output

```
[Running] cd "c:\Users\savi"
FactoryMethod.java && java
Word Doc is opened.
PDF Doc is opened.
Excel Doc is opened.
```

Result

Factory Method Design Pattern was implemented successfully for creating different document types using factory classes.
